THE 2027

Capsule Planner

Plan all four seasons. Fewer clothes,
more outfits — on one printable.

4 seasons = 1 plan

Plan the year once. Each season is a 30-minute refresh, not a rebuild.

Closet Arithmetic · closetarithmetic.pages.dev

How to use this planner

Start with the January reset. The rest of the year is just a refresh.

1. Clear the closet. Take everything out. Put back only what you wore in the last month and love. Box the rest for now — nothing gets thrown away today.

2. Pick your colours. Look at what you kept. Which three colours show up most? Those are your base colours. Add one accent.

3. Count your pieces. Aim for 10 to 20 per season. Use the checklist (closetarithmetic.pages.dev/capsule-checklist/) for the 12 essentials.

4. Check the math. Every piece should match at least three others. If a piece only works with one thing, it does not earn its place.

5. Shop the gaps only. Write the gaps on the shopping list (page 8). Buy in your colours — and check “matches 3+ pieces?” before you pay.

5 tops × 3 bottoms = 15 outfits

Before layers, shoes or accessories. That is the whole trick.

Winter

December – February — Coats, knits, boots. Your warmest capsule.

My colours

Base 1	Base 2	Base 3	Accent

My pieces

Category	Pieces I own	Pieces I need
Tops		
Bottoms		
Layers		
Shoes		
Bags & accessories		

`______ pieces = ______ outfits`

Count the pieces, then count the outfits. Every piece should match at least 3 others.

Notes

Spring

March – May — Light layers, trench, loafers. The fresh start.

My colours

Base 1	Base 2	Base 3	Accent

My pieces

Category	Pieces I own	Pieces I need
Tops		
Bottoms		
Layers		
Shoes		
Bags & accessories		

`______ pieces = ______ outfits`

Count the pieces, then count the outfits. Every piece should match at least 3 others.

Notes

Summer

June – August — Linen, cotton, sandals. The lightest capsule.

My colours

Bottoms		
Layers		
Shoes		
Bags & accessories		

`______ pieces = ______ outfits`

Count the pieces, then count the outfits. Every piece should match at least 3 others.

Notes

Fall

September – November — Trench, sweaters, ankle boots. The reset season.

My colours

Base 1	Base 2	Base 3	Accent

Tops		
Bottoms		
Layers		
Shoes		
Bags & accessories		

`______ pieces = ______ outfits`

Count the pieces, then count the outfits. Every piece should match at least 3 others.

Notes

Shopping list

Gaps only. Before you buy, check: does it match at least 3 pieces I already own?

Item	Colour	Matches 3+?	Price	Bought

Outfit tracker

Note the outfits you actually wore. Next season's capsule is built on evidence, not guesses.

Date	Top	Bottom	Layer	Shoes	Loved it?

My formulas

Write down the outfit formulas that work for you. Top + bottom + layer + shoes = a finished outfit.

Formula 1

_____ + _____ + _____ + _____ = _____

Formula 2

_____ + _____ + _____ + _____ = _____

Formula 3

_____ + _____ + _____ + _____ = _____

Formula 4

_____ + _____ + _____ + _____ = _____

Formula 5

_____ + _____ + _____ + _____ = _____
